3. Remediation Reference

SSRF

Whitelist allowed destination domains. Block requests to 169.254.0.0/16, 10.0.0.0/8, and 192.168.0.0/16. Disable HTTP redirects or re-validate the final destination URL.

XSS

HTML-encode all user-controlled output before rendering. Implement a strict Content-Security-Policy header. Use HttpOnly and Secure flags on session cookies.
